

Fernando del Olmo Martín

Senior Software Engineer · Angular · Ionic · Remote-First

Madrid, Spain | +34 666 96 20 80 | fer.olmo92@gmail.com | linkedin.com/in/fdom92 | github.com/Fdom92 | ferolmo.com

PROFESSIONAL SUMMARY

Software engineer with 10+ years building web and mobile products, 8+ of them fully remote for US companies. Most of my work is in Angular, Ionic, TypeScript and Firebase, taking client projects from scoping and architecture through to production, and acting as technical reference for junior developers. Currently exploring Nx monorepos and microfrontends (Native Federation) in a side project.

TECHNICAL SKILLS

Frontend	Angular (Signals, standalone components), TypeScript, RxJS, JavaScript (ES6+), HTML5, CSS3, SASS
Mobile	Ionic, Capacitor, Stencil (web components)
State & data	NGXS, Firebase, REST APIs
Backend	Node.js
Testing	Jest, Vitest, Cypress, Playwright
Tooling	Nx, Native Federation, esbuild, Webpack, GitHub Actions (CI/CD), Git
Ways of working	Scrum, Agile, remote-first asynchronous collaboration

PROFESSIONAL EXPERIENCE

Senior Software Engineer · OpenForge

Apr 2018 – Present · Remote (Philadelphia, PA, USA)

- Led the full development lifecycle of client projects, including the Edwards Lifesciences mobile app, from scoping and architecture planning through to production delivery.
- Built cross-platform mobile and web applications using Angular, Ionic, Capacitor, Stencil, NGXS, Firebase and Node.js.
- Improved team development processes, tooling and coding standards across projects.
- Onboarded and mentored junior developers through architecture guidance and code reviews.
- Collaborated in a 100% remote, asynchronous environment across multiple US time zones.

Startup Wars — internal OpenForge product

- Joined in the early development phases of a competitive strategy platform, now used by 10k+ users and 100+ US institutions.
- Developed and maintained core product features using Angular, Ionic, Firebase, NGXS and Node.js.
- Drove Scrum ceremonies (sprint planning, standups, retrospectives) and code reviews through rapid early-stage iteration, and contributed to architectural decisions.

Software Engineer · Webjunto

Nov 2017 – Apr 2018 · Remote (Philadelphia, PA, USA)

- Assisted in the full development lifecycle of web and mobile products, from architectural scoping to implementation, and kept the team up to date on emerging tools.
- Stack: Angular, Ionic, Firebase, Node.js.

Frontend Developer · BEEVA (BBVA Group)

Oct 2016 – Oct 2017 · On-site (Madrid, Spain)

- Developed new features for an internal BBVA application and later joined the innovation team.
- Worked with ES6, Webpack, Babel and Karma in a modern JavaScript environment.

Earlier experience · 2014 – 2016

- **Sopra Steria** (Mar – Oct 2016, Madrid) — Sanitas mobile app with Ionic v1, AngularJS and SASS.
- **BQ** (Dec 2015 – Feb 2016, Las Rozas) — Bitbloq, a robotics education platform for children, with HTML5, SASS and AngularJS.
- **Altran España** (Apr – Oct 2015, Madrid) — internal mobile tools with Apache Cordova, HTML5, JavaScript and CSS.
- **Taalk** (Oct 2014 – Jan 2015, Madrid) — real-time collaborative language learning platform with Django, jQuery and Socket.io.

PERSONAL PROJECTS

- **Cerberus** (fdom92.github.io/cerberus) — offline-first web app that checks whether a suspicious SMS, link or QR code can be trusted, tuned to the phishing campaigns circulating in Spain. Built with AI assistance; the product decisions and testing were mine. Open source.
- **Minishop** — Nx monorepo exploring microfrontends: Angular shell with esbuild and Native Federation, Vitest, and a Stencil design system in progress.
- **PantryMind** (github.com/Fdom92/Pantry-Manager) — pantry app to track household inventory, cut food waste and plan meals. Launched on Product Hunt.

EDUCATION & LANGUAGES

B.Eng. in Computer Engineering (Ingeniería Informática) — Universidad Autónoma de Madrid, 2010 – 2016

Spanish: Native · English: C2 Proficient (EF SET, Jun 2026 — cert.efset.org/eHU38y)
